furthermore the scope of a case study as it evolves may become unwieldy thus making it necessary to edit the study what is chosen to edit out of the case study may be an important aspect to some readers while not important to others how can these decisions be made a more practical approach is to include case studies by referral if necessary and not as part of the actual textbook textbooks are excellent for information that does not change whereas they are an extremely poor medium for aspects of information that change often specific technologies might change often and frequently within information technology but the classes of those technologies do not tend to change as often and therefore have a place in a textbook this book will differ from others in that it will contain the facts and only the facts anything else the reader can follow up themselves
